

## FINISH REPORT

A Finish Report is available in the 'Cutting sheets and other production reports' icon on the Current Quotes toolbar. The Finish Report will calculate for individual quotations the full and partial lengths required for each extrusion. This will allow the fabricator to determine whether or not to have partial lengths sent for finishing or to send all full lengths. The report will also indicate the total metres (square or lineal, depending on the option selected in the setup of the program) to be finished.

- Select Quotes | Current
- Highlight your quotation
- Select Cutting Sheets and other production reports

The screenshot shows the QuoCut Professional software interface. The 'Current Quotes' window displays a list of quotations with columns for Quote, Cust., Price Ex GST, Cust Ref, Customer, Date, Description, Rep, and Date Req. The 'Cutting Sheets etc' dialog box is open, showing various options for generating reports. The 'Finish Report' option is highlighted with a red circle.

Quote	Cust.	Price Ex GST	Cust Ref	Customer	Date	Description	Rep	Date Req
